1. Write a program to find the sum of list elements except prime numbers.

2. Write a program to find the list element closest to zero.

3. Write a program to sort elements of list in descending order and replace elements at odd positions with *.

4. Write a python program to print the following pattern.

    *

    $*$*

    * * *

    $*$*$*$*

    * * * * *

    $*$*$*$*$*$*

5. print this pattern using python programming.

    0

    1 0 1

    2 1 0 1 2

    3 2 1 0 1 2 3

    4 3 2 1 0 1 2 3 4

    5 4 3 2 1 0 1 2 3 4 5

6. print this pattern using python programming.

    1
    121
    12321
    1234321
    123454321
    12345654321

7. Write a program to delete all prime numbers in an array and find out the sum of array elements after deleting.
